Professional Summary

Enthusiastic Computer Science undergraduate specializing in **MERN Stack Development** (MongoDB, Express.js, React.js, Node.js). Experienced in building full-stack web applications with secure authentication, RESTful APIs, and responsive user interfaces. Strong understanding of backend architecture, database management, and real-time application workflows. Passionate about developing scalable, user-centric web solutions.

Education

• **Pillai College of Art, Commerce and Science, Panvel**
Bachelor of Science in Computer Science, CGPA: 9.56/10 (SEM-4)

Navi Mumbai, India
2024 – 2027

• **Citizen Education Society, Uran**
Higher Secondary Certificate (HSC) – Science, Percentage: 82.83%

Navi Mumbai, India
2023 – 2024

Experience

• **Software Developer Intern | Garunacdx Software Solutions LLP**

Mar – Apr 2026

- Developed a client project tracking portal using Next.js (App Router) and Supabase, enabling real-time project visibility and streamlined communication.
- Designed and implemented database schema (projects, tasks, milestones, activity feed) and integrated CRUD operations for end-to-end project management.
- Built role-based workflows with separate admin/team and client dashboards, ensuring secure data access and intuitive user experience.
- Integrated Supabase authentication (magic link and email/password) and optimized frontend performance through efficient data fetching and state management.

Projects

• **Clinic Management System ([GitHub](#)) | *React.js, Node.js, Express.js, MongoDB, JWT*** Dec 2025
Authentication

- Designed a full-stack clinic management system with role-based access for Patients, Doctors, Schedulers, and Receptionists using secure JWT authentication.
- Implemented complete appointment lifecycle: requests, approvals, medical report generation, dynamic billing, payment tracking, and PDF downloads.
- Built RESTful APIs with MongoDB and delivered responsive dashboards with real-time updates and robust error handling.

• **Git Score – GitHub Analyzer ([GitHub](#)) | *React.js, Node.js, Express.js, MongoDB, GitHub*** Mar 2026
API, Google Gemini AI, JWT

- Built a full-stack GitHub analytics platform evaluating developer profiles and generating a productivity score (0–100) based on repositories, activity, stars, and consistency.
- Integrated GitHub REST API for real-time data and Google Gemini AI for insights, role classification, and improvement suggestions.
- Implemented JWT + bcrypt authentication with saved/liked profiles, personalized dashboard, and global/personal leaderboards.

• **Zoo Management System | *Java, Servlets, JSP, JDBC, MySQL, Apache Tomcat***

Jan 2026

- Developed a web-based Zoo Management System to manage animals, caretakers, and visitor feedback with CRUD operations and role-based authentication (Admin & Visitor).
- Built backend using Java Servlets and JDBC with MySQL; deployed responsive UI on Apache Tomcat with caretaker assignment and feedback management.

Technical Skills

- **Languages:** JavaScript, Python, Java
- **Databases:** MongoDB, MySQL, Supabase
- **Frameworks:** React.js, Next.js, Node.js, Express.js, Java Servlets, JSP, HTML, CSS, Tailwind CSS
- **Tools:** Git, GitHub, Postman, RESTful APIs, Visual Studio Code, Vercel, Render, Supabase
